

KEERTHANA BELLAM

New Jersey, USA | +1 856-272-2518 | keerthanabellam23@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Generative AI-focused Data Science graduate skilled in building and deploying LLM-powered applications using Fast API and OpenAI API. Experienced in machine learning, prompt engineering, ETL pipeline automation, and scalable cloud-based data systems. Strong foundation in SQL, distributed databases, and production-ready AI deployment. Passionate about developing intelligent systems and scalable AI-driven solutions.

TECHNICAL SKILLS

- **Programming:** Python, SQL, R
- **Generative AI:** OpenAI API, LLM Integration, Prompt Engineering, Chatbot Development
- **Machine Learning:** Regression, Classification, Random Forest, SVM
- **Data Engineering:** ETL/ELT Pipelines, Medallion Architecture (Bronze/Silver/Gold), Data Modeling
- **Databases & Data Warehousing:** MySQL, Cassandra, Snowflake, Astra DB
- **Cloud & Deployment:** AWS, Microsoft Azure, Oracle Cloud, Render, Netlify
- **Data Tools:** Pandas, NumPy, Matplotlib, Seaborn, Apache Spark (basic)
- **Visualization:** Power BI, Excel

EDUCATION

Rowan University, USA

Master of Science, Data Science

May 2026

USA

Koneru Lakshmiah Educational Foundation, India

Bachelor of Technology, Computer Science Engineering

2024

India

PROFESSIONAL EXPERIENCE

Builtin Tech

Jul 2022 - Oct 2022

Data Analyst

- Conducted exploratory data analysis (EDA) using Python (Pandas, NumPy) to identify trends and patterns while enforcing data governance standards
- Automated ETL/ELT pipelines for data cleaning and preprocessing, reducing manual effort by ~30%
- Developed and optimized advanced SQL queries in Snowflake on AWS for efficient data retrieval and processing at scale
- Designed and implemented scalable star schema data models in Snowflake to support analytical workloads and business intelligence initiatives

Rowan Recreation Center

Jan 2025 - Present

Main Office Assistant

- Collected, organized, and maintained memberships and transaction data, ensuring accuracy and consistency across records.
- Used Excel (formulas, filtering, sorting, basic pivot tables) to track daily attendance, revenue, and membership trends.
- Generated periodic summary reports to support operational planning and decision-making.
- Identified and corrected data discrepancies, improving overall data quality and reporting reliability.
- Assisted supervisors with compiling performance metrics and preparing structured data for internal reporting.

PROJECTS

AI Resume Assistant (Live Deployed GenAI Application)

- Engineered a production-ready LLM-powered resume assistant using Fast API and OpenAI API
- Implemented prompt-engineered system constraints to prevent hallucinations
- Configured CORS policies and secure environment variable handling for cloud deployment
- Designed real-time API architecture integrating backend (Render) and frontend (Netlify)

Big Data Analytics Pipeline (Medallion Architecture)

- Designed distributed data system using Cassandra and Astra DB
- Processed and transformed 100K+ records using Medallion Architecture, improving query efficiency and data reliability.

FARM ERA 2.0 – Smart Farming Analytics

- Developed Random Forest-based crop prediction model
- Built TensorFlow-based pest detection system

Health Welfare Analysis

- Built classification models (SVM, Logistic Regression) for healthcare datasets
- Applied feature engineering and performance evaluation Tools: Python, SQL, Machine Learning

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals
- Oracle Cloud Infrastructure 2023 Certified Architect Associate
- Automation Anywhere RPA Certification

VOLUNTEER EXPERIENCE

Ignited Minds

Jun 2022

Student Volunteer

- Collaborated with schools and NGOs to support education for underserved students.
